ISHTIAQ**

# WHO WE ARE?

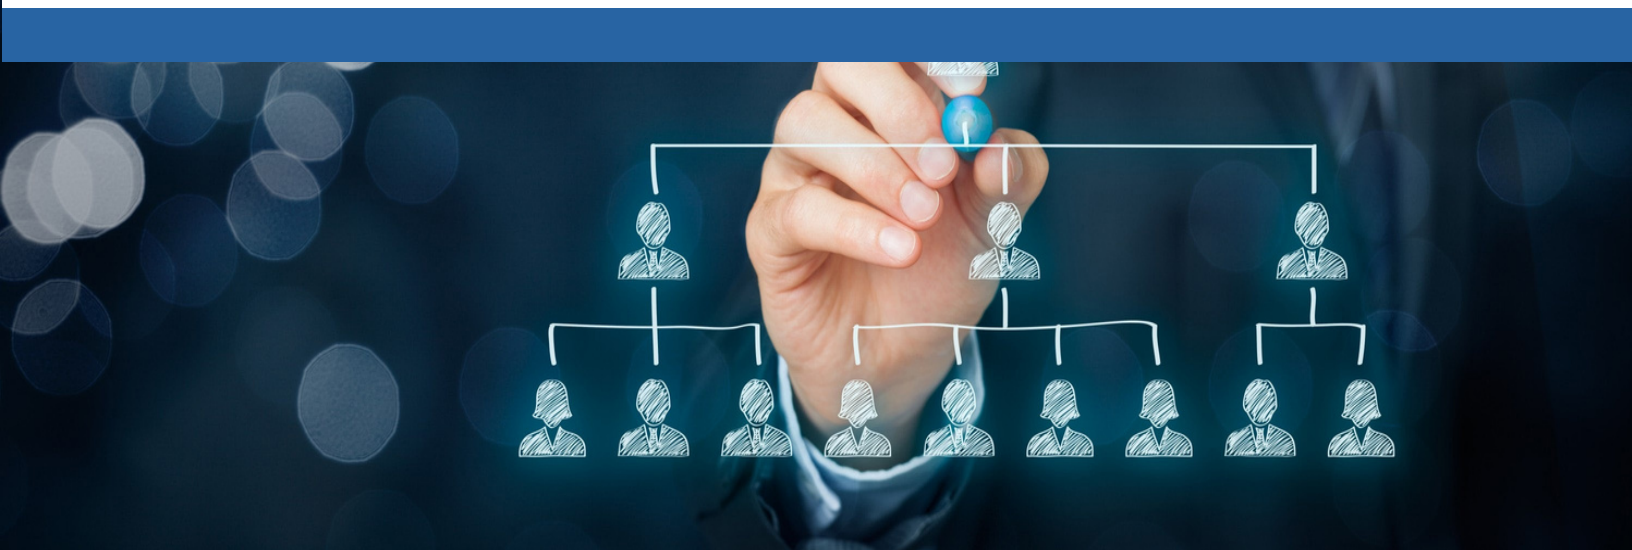

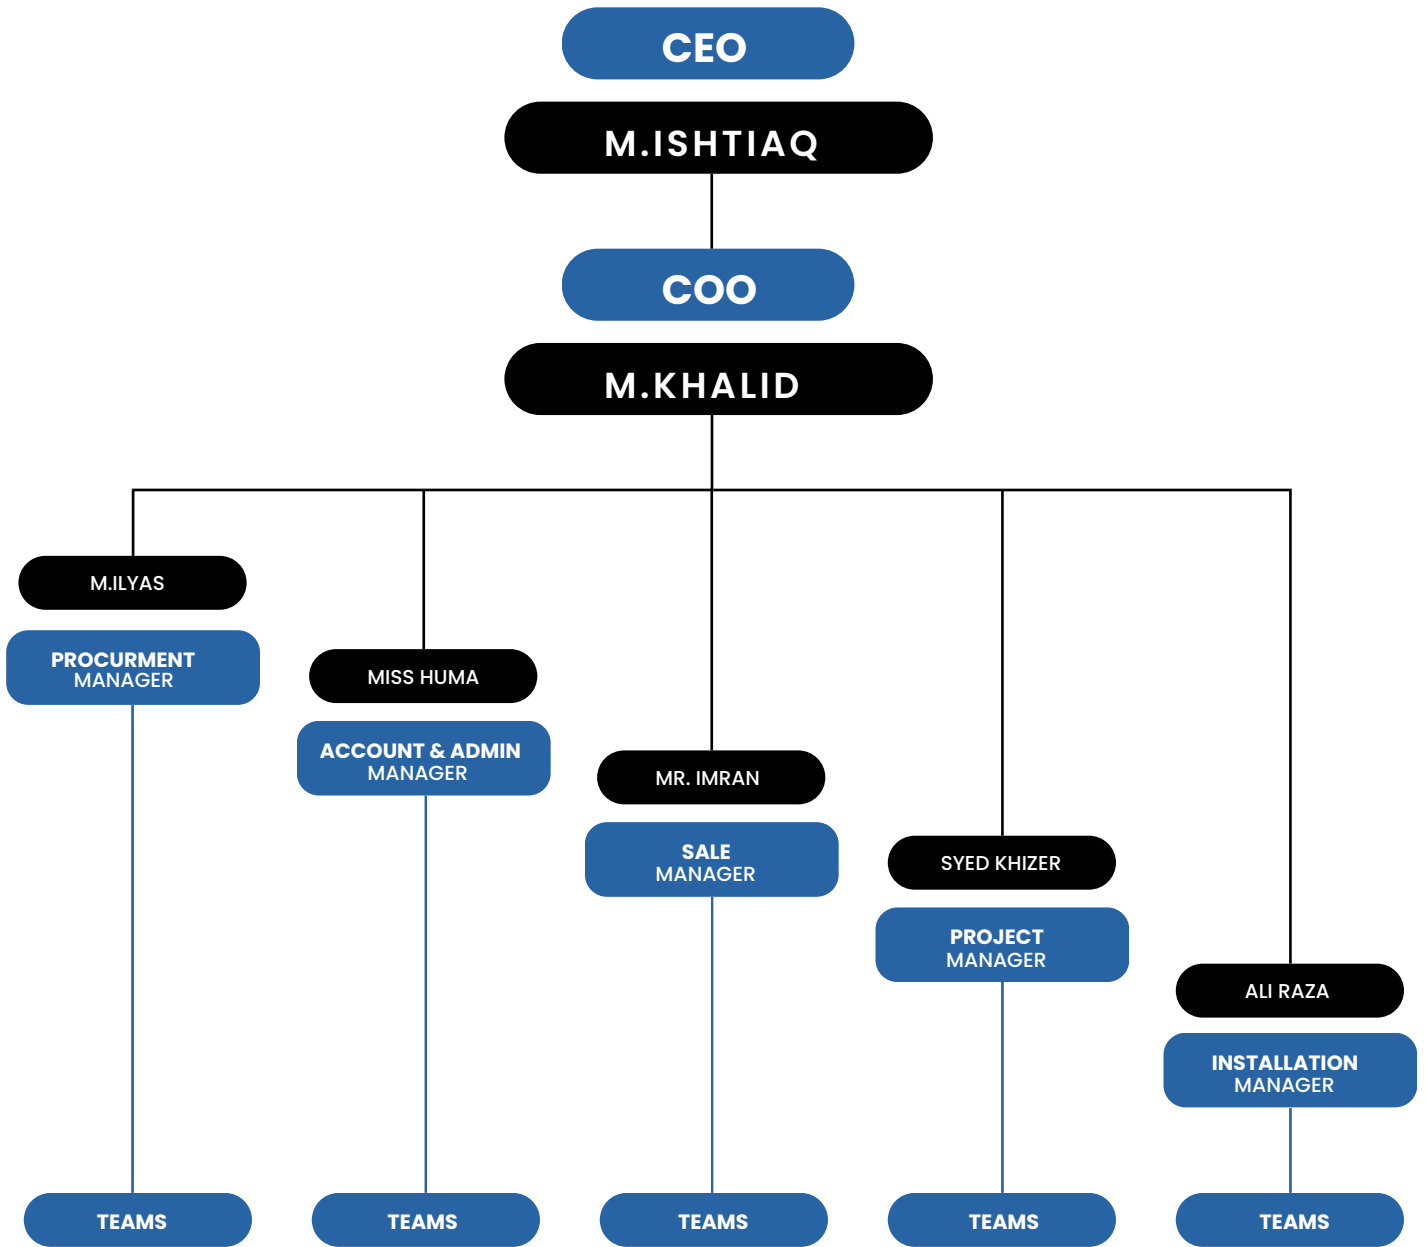

Beginning its journey back in 2019, Air Comfort Solutions established as a heating, air conditioning and ventilation providers in Lahore, later succeeded in becoming one of the leading air conditioning, heating and ventilation equipment company in Lahore. The company is covering almost all the major areas of Pakistan through maintaining the highest degree of professionalism and integrity. We provide services related to HVAC designing, installation, maintenance, ventilation and overall climate control with a vast range from Split system to a complex HVAC system like V.R.F, V.R.V, Chiller, Split systems etc. By keeping our focus on environment friendly and energy effective air conditioning products, we always keep the keen eye on the requirements of our domestic, corporate, national and international clients resulting in developing reputation as being most successful and reliable company for our clients.

We have set benchmarks in HVAC industry for our exceptional customer-oriented company. We nurture relationships with our valued clients and provide top quality installations, maintenance and caring service, with timely and professional interactions by our team of skilled professionals. We create comfortable homes and workplaces where families and employees gather and find serenity and breathe easy. We take pride for delivering best possible solutions in the competitive market by inducting paths of excellence in service while being lucrative at all times, our professionals consider every job significant and work for your complete satisfaction. By keeping close association with our customers and by hard work of our expert employees we have earned a respectable place in the market.

## **OUR TEAM**

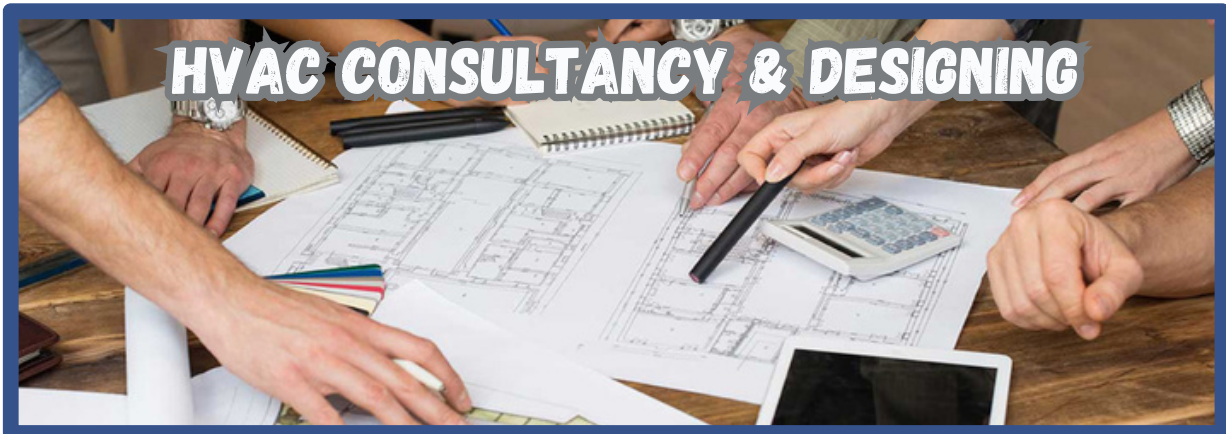

As in corporate success, a good team plays major role in company's success, our company's management structure and devoted staff are playing the key role in our success. We have a professional team which is working tirelessly to bring your dream comfort in reality. Our highly skilled and professional staff is our bigger asset, all of our employees working in our company have vast experience of working on diversified projects of national as well as international level. Our technicians, engineers and management staff, all our aligned together to give unmatched customer experiences while keeping the services standards elevated. Their keen dedication to serve clients with best solutions is our real asset.

# OUR SERVICES

We offer following services to domestic, cooperate and industrial clients:

# OUR PRODUCT

## 1. CHILLER SYSTEM

We offers complete supply and installation of all types (brands) of chiller air conditioning systems and Annual operation and maintenance contracts.

## FEATURES

- Long life cycle.
- Wide range for selection just according to your needs.
- Suitable for 24X7 hour operations.
- Capacity stats from 2.0TR to more than 3000 TR.
- It can be connected with a fully atomization operating system which helps for additional energy saving.

## 2. VRV / VRF (HOME SERIES)

ACS provides complete solution including supply & installation of VRV / VRF home series.

### FEATURES

- One outdoor AC unit can be connected multiple units.
- Comes with advanced inverter scroll compressor.
- Only one outdoor unit is required instead of multiple outdoor units Save Space.
- Hot & Cold System gives Heating in winter & Cooling in summer.
- Mobile Connectivity - It can be controlled by your Smartphone.
- All ACs can be controlled centrally with a single remote.
- helps for additional energy saving.

### 3. VRV / VRF ( COMMERCIAL SERIES )

A wide range of commercial VRV/VRF systems are on ACS's panel from all major and renowned brands.

### FEATURES

- It is the Most Flexible system in terms of Capacity in Ton, Selection of Indoor Units Type, Piping Length, Controls, and many more.
- Inverter-based system makes running cost very low.
- The single outdoor unit is connected with a variety of indoor units so it saves space.
- Centralized Remote Control gives you the facility to control all systems from one place, and can be connected to automation or computer system. Most advance in technology.
- Diversity: The capacity of outdoor can be lower than the total capacity of Indoor units.
- A wide choice of Indoor Units is available like One-way Cassette, Hi-wall, Ducted, 4-way cassette, Ceiling Concealed, etc.

## 4. DUCTABLE ACS

ACS offers ductable and packaged air conditioners in all sizes and brands, including Daikin, Midea, York, Mitsubishi, Oient, LG, and Hisense.

### LIGHT COMMERCIAL ACS

- For high occupancy areas i.e. restaurants, marriage halls, conference halls, large offices, malls, etc.
- Available with Eco-Friendly Refrigerants.
- Ducted Indoor Unit Connected to Single Outdoor Unit with Multiple Compressors. All different indoor units can be controlled individually.

### PACKAGED ACS

Shopping malls, restaurants, supermarkets, factories prefer these units due to their high static pressure.

## 5. AHU ( AIR HANDLING UNIT )

The air handling unit (AHU) is the heart of central air conditioning. It collects outside air and room air, removes dust and other particles from the collected air, adjusts the temperature and humidity and then supplies comfortable and refreshing air-conditioned air into the rooms through ducts

### FEATURES

- Maximize air quality standards in your office building or commercial premises.
- Safer working environment for everyone in terms of air.
- Excludes harmful particles that could lead to ill health and damage to the interior surfaces of the building.

## 6. SPLITS

Split systems air conditioners are popular for compact areas when heating or cooling is required to targeted areas of a home, the fact that they can be quickly installed in a few hours and can regulate the temperature of a room makes it a quick and affordable option for home/office heating and cooling.

## 7. VENTILATION SYSTEM

We design Exhaust Ventilation System for commercial buildings to provide fresh air solutions for the Basement, Toilets, and Kitchen. We offer High Static Blowers and Inline Fans based on your requirements. Our blower design and selection will provide you with the best results in terms of performance, noise, power consumption, and cost.
